

# F100 Fog Machine

The F-100™ performance fog generator is designed to meet the rigorous demands of the nightclub, theatrical and touring industries. This reliable unit produces any atmosphere – from dense fog to fine mist. The F-100's pump is acoustically isolated from the chassis, resulting in low noise levels ideal for theatrical and studio work. High End Systems Atmospheres® Fog Generating fluid is specially formulated to provide a dense, safe, water-based fog of a fine particulate size. The F-100 offers multiple control options, including a timer/interval remote, a DMX 512 remote and 0-10 V analog control. At its highest output setting, the unit emits 15-second-long fog blasts and can be adjusted to run continuously for any atmospheric requirement.

## Features

- Large 9.5 liter ( 2.5 gallon) removable fluid reservoir for extended use
- Available with either the timer remote control or the DMX version
- Atmospheres® scientifically formulated fluid provides optimum particulate size for lighting applications
- LED status indicators
- Fluid level sight gauge
- User replaceable fluid filter
- Thermocouple over-temperature protection

## Construction

- Low-maintenance, corrosion-resistant vaporizing chamber
- Dual carrying handles
- 100mm (4in.) integral output collar for optional distribution ducting
- 3-pin XLR connector
